Short Bio

I am André Silva, a postdoctoral researcher at the Instituto de Astrofísica e Ciências do Espaço. My research spans instrumentation and exoplanetary science. I am currently working on the PoET solar telescope, leading the development of its observation software. In parallel, I focus on the development of novel algorithms for precise radial velocity extraction and analyze systematic effects that impact such measurements. Over the past three years, I have lectured an advanced course on Python, a Master's-level course on Bayesian statistics, and a PhD-level module on high-resolution spectroscopy.

Education

PhD	Faculdade de Ciências , Doctor's Degree in Astronomy <ul style="list-style-type: none">Thesis - A new paradigm for the estimation of precise stellar radial velocities	Universidade do Porto 2019 – 2024
MSc	Faculdade de Ciências , Mestrado Integrado em Engenharia Física <ul style="list-style-type: none">Thesis - An expansion to the CHEOPS mission official pipeline.	Universidade do Porto 2014 – 2019

Awards

IAU PhD Prize 2024 🔗 , Division B	2025
<ul style="list-style-type: none">Awarded the PhD Prize 2024 from the International Astronomical Union (IAU) Division B (Facilities, Technologies, and Data Science) for the work developed during my PhD thesis.
